### WHISKY MUST GO BEER MAY STAY LATEST PROSPECT

Nobody in Senate Will Stand Up for Booze; Brewing and Winery Interests Hope President Won't Rule Against Them

BY C. S. ALBERT  
(Special Star-Bulletin Correspondent.)  
WASHINGTON, D. C., July 15.—Rum apparently is without a friend in the Senate. Those statesmen in that body who heretofore have said a kind word for liquor evidence a disposition now to remain silent.

It thus happens that all forms of distilled spirits have gone by the board for the duration of the war. Indications are that beer and wine will be left to the discretion of the President.

The fight for a bone-dry nation went too far. It became necessary for the President to interfere, suggesting a compromise. In his judgment only distilled liquors should be totally barred. The prohibitionists accepted this proposition. On this basis the situation assumed this shape:

An amendment to the Food Control bill by Senator Chamberlain certainly will be adopted. It forbids the use of any foodstuff, fruit or cereal in the distillation of spirits during the war. This becomes effective 30 days after the passage of the measure. Authority is conferred to the commander the more than 235,000,000 gallons of whisky already in bonded warehouses, if necessary for governmental uses. Otherwise this large quantity will be available for sale and beverage purposes until exhausted.

The proposition championed by Senator Chamberlain seems satisfactory to all quarters. Even Senators Underwood and James accept its stipulations. This would leave the beer and wine proposition as it stands under existing laws.

Senator Gore and the committee on agriculture desire to go a trifle beyond this point. They have presented an amendment placing the prohibition of beer and wine manufacture in the discretion of the President. This will be offered in the Senate, but acceptance is doubtful. In any event it is unlikely the President would forbid the use of cereals and fruits in making beer and wine unless an emergency arose requiring such drastic action.

Hence whisky appears to be the chief beverage destined to go down and out during the war period.

The question of nation-wide and bone-dry prohibition, under the compromise indicated, will be left for determination until events shape themselves, or the war reaches a termination.

### GERMAN WAR MINISTER, PEACE OPPONENT, QUILTS

LONDON, Eng., July 16.—Official announcement from Berlin, forwarded here from Bern, announces the resignation of General von Stein, German minister of war. Von Stein has been a leader in the pan-German party and is one of the most bitter opponents of the recently promulgated doctrine of peace without indemnities and without annexations. His resignation, following on the heels of that of the imperial chancellor, indicates the substantial growth of the peace party throughout Germany.

### U. S. JAILS GERMAN HERE

Because he failed to secure a permit allowing him to reside and do business in the local restricted areas, Karl Koessler, an alien German who is said to be the proprietor at a local hotel, King and Alakea streets, was arrested by Marshal J. J. Smiddy today without court process and is confined in Oahu prison.

This is the first arrest that has been made for a violation of the requirements that every alien German in Honolulu secure a permit permitting him to reside in the areas within half a mile of forts and other government works and also in the business district, which has been set aside as a restricted area.

Koessler had a month in which to secure his permit, says the marshal, and he was given every leeway.

The marshal has informed Washington of his action in arresting the German, and Koessler will be held in Oahu prison pending the receipt by the marshal of instructions from Attorney-General Gregory. No warrant or other court process was used in the arrest of Koessler. Marshal Smiddy simply took him into custody and placed him in prison.

"Court process is not necessary in a case like this," says Smiddy.

According to the marshal, Koessler is the German who was found hidden in the coal bunkers of the Panama after the officers and crew had been arrested by the marshal on February 4, this year, for attempting to destroy their vessel in the harbor.

### ELABORATE APARTMENT HOUSE TO COST \$200,000 PLANNED; SITE REMAINS TO BE CHOSEN

A \$200,000 apartment house will be built in the business section of Honolulu as soon as the arrangements for its construction can be completed. If the plans of Dr. H. Homer Hayes, former city and county physician, materialize.

Although several sites are now being considered by the purchaser, the plans for the building have been completed and will have to be altered but slightly according to the site decided upon. The plans provide for about 50 suites, each having a living room, sleeping room, kitchenette, and proper closet facilities, and about 24 single rooms.

The building has been planned with a court in the center where a swimming pool will be built. A roof garden will be arranged on the roof. With the center open, all of the apartments will have ample light and air.

The building will be four stories high and will be made of concrete. Special kitchen facilities will be provided those who do not wish to work in their own kitchenettes. This will be in a large kitchen on the lowest floor.

To furnish army and navy officers with a place to go where they will find all the advantages of furnished rooms and janitor service, and from which they can leave on short notice without any extra expense, is one of the chief purposes for constructing the building, said Dr. Hayes this morning.

"Everything has been planned to make the apartments of the very first class," said Dr. Hayes, "and the owners will cater only to first class trade."
